NEREUS

Europe's flagship space programs, Copernicus and EGNOS/ Galileo, provide data and signals which can be transformed into useful information for Regions across Europe. Space technologies can be used to address specific territorial management issues related to agriculture, traffic and transportation, water and air quality. Because Regions are both key users and procurers of products and services based on space technologies, enhancing the regional dimension of European space policy becomes fundamental to bring the added value of space to citizens.

As Network of European Regions Using Space Technologies, NEREUS offers a dynamic platform to all Regions aiming at making a better use of space applications for the delivery of efficient public policies benefiting citizens. NEREUS serves as an advocate for regional concerns, voicing the regional dimension of European space policies and programs at a political level. Striving to be a key source of information on space matters for our members, we aim at increasing the awareness and understanding of space solutions for all public users.

NEREUS, since 2007.
Space on Earth, Space for all.

Mission

- Spread the uses and understanding of space technologies among European Regions and their citizens;
- Advocate the regional dimension of European space policies and programs;
- Connecting space to non-space communities.

We offer a dynamic platform to

Regional/local:

- Improve the awareness and understanding of space technologies in your region;
- Fully exploit the potential of space applications in support to public policies for a better informed decision-making;
- Bridge EU space policies and programs to your regional strategies to better anchor space uses to the needs of your territories and citizens;
- Strengthen and develop your local space community;
- Raise the profile and visibility of regional space-related activities and capabilities;
- Integrate the space dimension in regional innovation and SME programs and policies.

Inter-regional:

- Support local politicians, entrepreneurs, researchers and students in grasping relevant opportunities at European level;
- Build strong European partnerships and to mobilize solid initiatives in a broad range of sectors;
- Enhance cross-sectorial exchanges among operators from the space and the non-space communities.

European:

- Advocate Regions' key role in developing the space market by driving the demand for space-based products;
- Relay the regional dimension of European space policies and programs towards the European institutions;
- Receive timely information on the latest developments of European policies and programs related to regional space uses in different fields.

Get involved

- Engage in an interactive learning process on how space applications can support the delivery of efficient public policies in your Region;
- Multiply business, research and training opportunities for stakeholders from your territory;
- Participate in NEREUS events and network with relevant stakeholders and like-minded partners;
- Exchange information and knowledge how space technologies can bring solutions to topics of your interest;
- Join EU and ESA funded interregional collaborations;
- Get support in all phases of the project cycle, from ideation to dissemination;
- Be represented in NEREUS General Assembly;
- Be represented in NEREUS Management Board;
- Provide strategic advice through your experts in the NEREUS Standing Committee;
- Provide strategic advice through your experts in the NEREUS Standing Committee;
- Take action in the NEREUS Working Groups.
