

## Master Planner to XYLEM WATER SOLUTIONS GLOBAL SERVICES AB/ SWEDEN

### About us

*Xylem, a leading global water technology company dedicated to solving the world's most challenging water issues, is the leading global provider of efficient, innovative and sustainable water technologies improving the way water is used, managed, conserved and re-used. Our international team is unified in a common purpose: creating advanced technology and other trusted solutions to solve the world's water challenges. We are committed to creating an organization of inclusion and diversity, where everyone feels involved, respected, valued and connected, and where everyone is free to bring their authentic selves and ideas.*

*If you are excited and passionate about helping us #letssolvewater, we want to hear from you! For more information, please visit us at [www.xylem.com](http://www.xylem.com).*

### Master Planner

We are looking for a Master Planner to strengthen our Sales and Operations Planning team located at our manufacturing site in Emmaboda, in Southeast Sweden.

As a Master Planner you will be responsible for supply planning process and identifying realistic supply capacity. You will be analyzing demand and supply gap and its impact on operational KPIs and Financial performance.

In this role you will work across a number of departments that involve several of internal stakeholders. You will be the focal point towards the S&OP supply planning meetings to build proposals for supply planning together with Production, Integrated Planning and Inventory Management. You will also represent Operations department in demand-supply-failure situation, facilitating issue resolution process in Operations and communicating closely with demand planning.

### Responsibilities:

- Analyse raw capacity based on historical capacity, total capacity of machining & assembly and supplier capacity
- Identify gaps between demand planning and supply capacity, including inventory condition, supplier issues and bottlenecks in production

- Facilitate demand & supply gap impact analysis on service, cost, inventory and P&L with Production, External Supply Planning, Inventory Management and Finance
- Build supply planning proposal including capacity, material and inventory with KPI impact and scenarios
- Lead S&OP supply planning meetings at Emmaboda site
- Monitor supply plan and analyze root-cause of discrepancy to improve supply planning process
- Manage supply planning performance, such as planning accuracy and target lead time adherence
- Facilitate communication between demand and supply planning as a single point of contact
- Administration of new products/components in the system

## Qualifications

- 5 years working experience in Supply Chain
- Academic degree in logistic or similar
- Fluent in English both spoken and written
- Solid knowledge in Excel and other MS office packages
- Strong analytical skills
- Production planning, demand planning or scheduling experience is a plus
- S&OP process experience is advantageous

We believe you are a driven, analytical and unpretentious person. You thrive and are confident in working in a changing environment, where you are involved and actively drive change forward. You are comfortable in working in high pace environment and possess a strong sense of responsibility for your tasks.

You are analytical and structured who enjoys working and interacting with people, therefore we see you possess excellent communication skills.

## Why Work at Xylem!

We offer you a creative and international environment where you get the opportunity to focus on your personal and professional development together with committed and helpful colleagues. Engage as a volunteer through Xylem´s business program for community initiatives Xylem Watermark:

[www.xylemwatermark.com](http://www.xylemwatermark.com).

## Application

We only accept applicants through [xylem.com/careers](http://xylem.com/careers)
