

## PROCESS OR ANALYTICAL CHEMIST TO SWEDEN

### About us

With a flexible and service-orientated organization develop, produce and provide global markets with high-quality precision wire with focus on long term business relationships characterized by high technology and niche needs. In Luma's "micro(n)world" everything starts with the customer. Creating long-lasting "sustainable" customer relationships lie in the nature of our business because it often takes a long time to create products according to our customers' demands.

We are now looking for a Chemist to join our team. We believe this is a person with university level or similar in chemistry related subjects, wants to be part of a technical journey with a small company, where the individual and the team are important.

### Main tasks

- Production's all plating-related electrolytes/chemistry. Analyzes and maintenance of existing baths. Understanding and ability to correlate process plating parameters, product quality as well as bath properties.
- Quality improvement and streamlining.
- New development and improvement of existing electrolytes/process baths.
- Lab and its organization and purchasing.
- Contact and collaboration with suppliers, travel.
- Communication with production.

### Important personal characteristics:

- Orderly, structure in work and in the workplace, lab
- Personal drive, own initiative
- Able to report both in writing and orally, in English
- Social competence, and being able to fit into the small company, being flexible and being able to adapt to the situation

**Type of contract:** permanent

**Working hours:** full time, 40 hours a week

**Salary:** individual salary based on Swedish Collective Agreements, 4000-4500 EUR gross

**Accommodation:** we do not have accommodation to our staff but we can help you find one.

### How to apply?
