

Job Description

JOB DESCRIPTION: MACHINE TOOL OPERATOR

Danieli Group started as a family-owned business in 1914 and has grown into one of the leading manufacturers of plants and machines for producing metals, meeting the needs and ambitions of customers worldwide. With more than twenty-five divisions comprising valuable, international and unique talents, the Group is rooted in the same values that have accompanied it since its founding: innovation, team spirit, excellence and reliability.

We are currently looking for talented Machine Tool Operators to join our team. The right candidates will operate in a structured production department and will carry out the following tasks:

- Tool setup and removal on tool machines;
- Loading/unloading of workpieces also by using specific lifting appliances;
- Assembly/disassembly of specific tooling according to workpiece machining cycle;
- Workpiece machining by stock removal technology using cutting tools and according to the working cycles of the utilised machining centre;
- Use of proper measuring instruments to check the tolerances indicated on drawings;
- Machine tool monitoring during machining, taking prompt action and reporting any production anomalies to shop supervisors;
- Ordinary maintenance of tool machines;
- Possible programming phase on board the machine.

REQUIRED SKILLS/ABILITIES

- Previous experience in similar positions;
- Good manual dexterity and experience in using measuring instruments;
- Excellent ability to read mechanical drawings;
- Dynamism, flexibility and ability to work in a team;
- Availability to work in three shifts (Saturdays included);
- Knowledge of Siemens language is preferred;
- Preference will be given to candidates with a recent diploma as industrial mechanic technician.

Place of work: Buttrio (Italy)

Type of contract and salary: Based on seniority and experience.
