

Job Description

JOB DESCRIPTION: METAL FABRICATOR

Danieli Group started as a family-owned business in 1914 and has grown into one of the leading manufacturers of plants and machines for producing metals, meeting the needs and ambitions of customers worldwide. With more than twenty-five divisions comprising valuable, international and unique talents, the Group is rooted in the same values that have accompanied it since its founding: innovation, team spirit, excellence and reliability.

We are currently looking for talented Metal Fabricators to join our team. The right candidates will operate in a structured production department and will carry out the following tasks:

- Construction of steel structures in compliance with guide drawings (produced by the Engineering Office), quality standards and assigned lead times, and using the main measuring instruments (gauge, micrometre, comparator) and work tools (e.g. cutting torch, grinding wheel, etc.);
- Analysis of Work Order and associated mechanical drawing;
- Handling of the parts to be assembled by EOT crane;
- Ordinary maintenance of the utilised instruments/tooling;
- Checking and reporting of any errors or modifications to be made to the technical drawing attached to the working cycle;
- Constant dialogue with the Quality Control Dept. and with the Timing & Methods Dept.

Experience and technical skills

- Diploma as Industrial Mechanic Technician or Certificate of secondary vocational education (mechanical specialization);
- Previous experience in the role of 4 or 5 years in structured industrial settings;
- Good knowledge and reading ability of technical drawings;
- Good knowledge of the main measuring instruments.

Aptitudes and Soft Skills

- Accuracy and dependability;
- Availability to work in two shifts;
- Determination and result orientation;
- Teamworking;
- Initiative and decision-making spirit.

Place of work: Buttrio (Italy)

Type of contract and salary: Based on seniority and experience.
